

Embracing

Onward, Upward and Outward

Colorado-based **SOURCE Local Foods** distributor launched its Source the Food App, which allows users to see where the food they buy, sell and eat is coming from. Users can perform directory searches using any combination of criteria: product type, product attributes, farm/source, food miles, product category, retail location, retail category and "catch all" to learn more about their food and the farmers and vendors who produce it.
