

## Full Circle Organic Farms

Longmont, CO

We currently farm 1,000 acres, which we lease from Boulder County Open Space. The farms are located in Longmont, Colorado with Longs Peak (14, 259 feet) to our west, where the watershed feeds our rivers and reservoirs. Ten farms make up the acreage, each one uniquely different than the others. We grow over 70 varieties of vegetables as well as small grains, grass hay and alfalfa. We utilize the hay and grain crops for rotation to give the soil the needed rest from vegetable production. We utilize every type of irrigation system, including drip, pivot, solid set, and flood. These different systems allow us to conserve and manage our crops with different needs.
