

Premium Biodiesel Fact Sheet

Company Overview

recycOil LLC is a developer and owner/operator of liquid waste recycling systems and closed-loop biofuel supply chains.
(Feedstock -> Manufacturing -> Distribution)

The recycOil® Vision

recycOil® is a premier developer of vertically-integrated regional supply chain and manufacturing infrastructure in biofuels, agriculture and sustainable rural-urban market linkages. **recycOil®** is dedicated to improving the sustainability of businesses and communities we work with by providing quality goods and services that are economical and environmentally sound.

Industry

Biodiesel, Bio-Fuels Feedstock, Restaurant/Industrial Services, Waste/Recycling, Agricultural Feedstock, Biofuels Manufacturing, Biofuels Distribution

Business Sectors

Bio-Fuels Supply Chains, Production & Distribution, Integrated Technology & IP Dev, Atmospheric Carbon & GHG Mitigation

Key Clients & Customers

1,600+ Restaurants/Food Service Facilities, Commercial Fleets, Commercial Farmers, Diesel & Gasoline Refiners & Distributors

Key Brands

recycOil® Waste Cooking Oil Recycling
bioXchange® Closed-loop Biofuels

Company Address

Premium Biodiesel Production

Providing a quality diesel supplement to the Rocky Mountain marketplace, **recycOil®** guarantees to its fuel customers that its biodiesel meets the following criteria:

Highest Quality Standards & Assurances

recycOil® ensures that every gallon of biodiesel fuel it provides is of the highest quality and meets or exceeds all ASTM 6751 fuel specifications. Incorporating in-house and third party laboratory testing, NBB BQ-9000 and other quality control protocols and best management practices into its total production management and supply chain, **recycOil®** ensures quality control at every step of the biodiesel life-cycle.

Best-In-Class Production Partners

Partnering with best-in-class biodiesel producers, **recycOil®** is consistently able to provide ASTM 6751 quality biodiesel from recycled feed-stocks. These partners employ rigorous process and quality control protocols – allowing for manufacturing precision, cost control, and quality assurance. **recycOil®** supplies these partners with high quality waste cooking oil and these production partners help **recycOil®** provide high-quality, cost-competitive biodiesel to the Rocky Mountain market.

Cost Competitive Diesel Supplement

Through vertical integration and total supply chain management, **recycOil®** provides the most competitive pricing possible to its biodiesel customers. By controlling feedstock quality, processing protocols, and rigorously managing transportation and production costs, **recycOil®** ensures that its biodiesel is a viable and high-value supplement to conventional diesel fuel. It is **recycOil's** business to ensure that our biodiesel fuel is good for your business and your bottom line.

Low-Hassle Transactions & Reporting

Reduce your transaction costs and administrative burdens with the support of **recycOil's** robust accounting and administrative back-office. By providing all required paperwork for local, state, and federal reporting requirements, including all IRS and Renewable Identification Numbers (RINs) documentation, along with all other Product Transfer Documents (PTDs) and Quality Assurance Certificates, **recycOil®** reduces the hassle and paper-work processing requirements for its biodiesel fuel customers.

Lowest CO2 & Greenhouse Gas Emission

recycOil® sources its primary biodiesel feed-stocks in regionally-scaled, closed-loop supply chains. With an energy yield up to 500% greater than other biofuels, biodiesel from recycled feed-stocks delivers very low carbon dioxide and other greenhouse gas (GHG) life-cycle emissions. Recycled feed-stocks, efficient production technology, and high quality control standards result in very low GHG emission fuel. Our climate-friendly biodiesel fuel helps us all reduce greenhouse gas emissions now, for a more sustainable, low carbon future!

Regional Feedstock and Domestic Fuel

recycOil's development of vertically integrated, regional supply chains means that our fuel delivers the highest value to Rocky Mountain fleets, distributors, and marketers – all manufactured from high-quality recycled feedstocks at fully compliant, leading biodiesel production partner facilities. Our customers know that every load of **recycOil®** biodiesel is creating jobs and economic benefits while improving air quality right here in Colorado.
